

# Learner Achievement Verification

This is to certify that the management of Alison has decided to award VENKATESH BHAT living in India the certificate of completion in Data Science - Regression and Clustering Models - Revised.

## Learner Details

Name: VENKATESH BHAT

E-mail: venkateshbhat2007@gmail.com

Country: India

## Course and Result

Score  
90%

Study Time  
4:45:41

### Data Science - Regression and Clustering Models - Revised

This course begins by discussing the process of regression modelling and how to improve the model. You will learn how to refine a regression model with R and Python as well as study cross-validation including how it can help you with your data. This course will also teach you how to use Azure ML's built-in modules sweep parameters and permutation features. You will also learn the steps needed to cross-validate a model.

## Modules Studied

Module 1: Regression modelling

Module 2: Classification Modelling

Module 3: Unsupervised Learning models

Module 4: Course assessment
