R for Data Analysis

This course will first cover the topic of manipulating and grouping data so that can you prepare and organize your output. You will then learn how to present this output via visualizations. You will also study important packages such as dplyr, tidyr, readr, data.table, SparkR, and ggplot2, along with how these packages can make data manipulation, visualization, and computation much faster.

Modules Studied

Module 1: Module 1: Data Manipulation with R

Module 2: Module 2: Efficiency and Data Visualization using R

Module 3: Module 3: R for Data Analysis Assessment
